English Mother tongue

French Fluent

Spanish Fluent

Concepts & Practices

REST API design ·

JWT authentication · CI/CD ·

Microservices · Design systems ·

E2E & unit testing · Load balancing

Languages & Tools

Vue.js · React · Angular ·

TypeScript · JavaScript · NestJS ·

Django · Python · PostgreSQL ·

Redis · Docker · Cypress · Jest ·

Azure DevOps · Git

Soft Skills

Patience · Attention to detail ·

Autonomy · Communication

References

Available upon request.

Alexander Halsey

FULLSTACK SOFTWARE DEVELOPER

Fullstack developer with 3+ years building production TypeScript applications — Vue.js frontends, NestJS/PostgreSQL backends, Docker deployments. I care about clean architecture and shipping features end-to-end, and I'm looking for a remote or Toulouse-based role on a product that actually means something.

Experience

Software Developer | January 2023 – June 2025

Careside (formerly Happytal), 59 Rue Pernety, 75014 Paris, France

Full-stack development on a digital-health platform present in 130+ French hospitals, within a 370-person company acquired by La Poste.

- Built and maintained a shared component library that kept the interface consistent across the company's applications and cut duplicated frontend work.
- Delivered full-stack features end-to-end, from database and API design through to the user-facing interface.
- Set up CI/CD pipelines that made releases repeatable and reduced manual deployment steps.
- Raised reliability by adding automated end-to-end and unit test coverage to critical user flows.
- Improved responsiveness under load by restructuring how internal services route and balance traffic.

Software Development Intern | July 2022 – December 2022

Careside (formerly Happytal), 59 Rue Pernety, 75014 Paris, France

First professional developer role, ramping up on the team's Vue.js and NestJS stack.

- Contributed frontend and full-stack features to the company's web applications.
- Learned the team's delivery workflow end-to-end, from ticket to deployed feature.

Projects

Donation Management System | Nov 2025 – Mar 2026

NestJS · Vue.js · PostgreSQL · Redis · Docker

Rebuilt a non-profit's donation platform I first wrote as a 2021 volunteer, replacing manual admin with automated donor records, tax receipts, and email campaigns.

github.com/AlexanderHalsey/Donation-Management-System

Job Tracker | May 2026 – Present

Next.js · React · Prisma

A job-search tracker that scrapes listings daily and scores each one for fit with AI, turning a scattered search into a single triaged pipeline.

github.com/AlexanderHalsey/JobTracker

Habit Tracker | Sep – Oct 2025

Tauri · Rust · React · SQLite

A desktop habit tracker that keeps daily routines on track with system-calendar sync and scheduled reminders.

github.com/AlexanderHalsey/Habit-Tracker

Personal Portfolio | Dec 2024 – Present

Angular · TypeScript · i18n

My personal portfolio, presenting my work to recruiters in three languages (English, French, Spanish).

github.com/AlexanderHalsey/AlexanderHalsey.github.io
